https://aliqyaan-mahimwala.vercel.app/

Summary

Computer Engineering student with hands-on experience building and scaling production software across frontend, backend, and database systems. Strong in feature ownership, performance optimization, production debugging, and shipping reliable systems with clean architecture and practical engineering judgment.

Education

Bachelor of Engineering in Computer Engineering, 2023 – 2027
Father Conceicao Rodrigues College of Engineering
CGPA: 9.6/10

HSC, *Pace Junior Science College* 2021 – 2023
87.3%

Professional Experience

Software Development Engineer Intern, *LearnLynk* 12/2025 – 05/2026
- Built and shipped 10+ production modules across admin, lead, and student portals, for a platform serving 100+ users
- Reduced API latency and bugs by optimizing RPC calls, replacing queries, and refactoring shared frontend and backend logic
- Strengthened tenant isolation, permissions, audit logging, and document workflows while handling production debugging

FullStack Development Intern, *Rayeva* 08/2025 – 11/2025
- Architected an end-to-end, 10-step seller onboarding and product verification system using React, Node.js, and PostgreSQL
- Built a seller dashboard for sustainability tracking and product listing, supporting 10+ sellers and 500+ entries
- Developed an AI-powered Green Product Reviewer using Gemini API to evaluate products across sustainability metrics

Frontend Development Intern, *Unsquare* 01/2025 – 03/2025
- Streamlined core booking flow navigation and usability by developing scalable, modular, reusable React components
- Decreased page load times by 25% by optimizing component layouts and minimizing unnecessary React re-renders
- Reduced UI errors and stabilized payment flows by robustly integrating backend REST APIs with frontend state management

Projects

Restaurant Booking System, *https://coffee-cup-gamma.vercel.app/*
- Improved table booking and event management through waitlisting and QR check-ins by building an end-to-end system
- Enhanced user decision making with immersive restaurant previews by adding a VR-based layout exploration feature
- Enabled secure access control and user interaction by developing authenticated backend roles and interactive pages

Budget Tracker, *https://budget-tracker-hike.vercel.app/*
- Built a cross-platform Next.js and mobile budgeting tool, actively helping 10 users manage their daily personal finances
- Solved network drop issues by adding local state caching and offline data synchronization across multiple user devices

Custom MCP Skill Retrieval Engine
- Developed a custom MCP server automating dynamic tool retrieval for autonomous agents to select and execute local skills
- Engineered a TF-IDF and Groq-accelerated Llama ranking pipeline to dynamically route optimal skills for task execution

Skills

Languages & Web Technologies
HTML, Tailwind CSS, JavaScript, TypeScript, SQL, Python, C, C++, React, Next.js, Three.js

Tools & Platforms
Git, GitHub, Render, Vercel, Firebase

Backend
Django, Node.js, Express, Flask, FastAPI

Data Analysis
Pandas, NumPy, Matplotlib

Database
MySQL, MongoDB, PostgreSQL

Other Skills
Problem-Solving, Debugging, Team Collaboration, Leadership

Achievements

- First Place – HackFusion, Sardar Patel Institute of Technology (SPIT)
- First Place – AuraFlix Hackathon
- Runner Up – Google Cloud Hackathon, Hack2Skill
- Domain Winner (Gen AI) – Sunhacks, Sandip University
