Education

Bachelor Computer Engineering, *Father Conceicao Rodrigues College Of Engineering* 2023 – 2027
CGPA - 9.5

HSC, *Pace Junior Science College* 2021 – 2023
86.3%
CET - 95.5 Percentile

Professional Experience

FullStack Development Intern, *Rayeva* 08/2025 – Present
- Built and deployed core e-commerce features (catalog, checkout, onboarding) with React, TailwindCSS, Node.js, and PostgreSQL.
- Helped onboard 10+ sustainable brands by creating scalable seller dashboards.
- Developed AI-powered onboarding tools, reducing setup time by ~30%.
- Integrated backend APIs for order management and sustainability tracking.
- Launched an impact reporting system displaying the footprint of 100+ purchases.

Frontend Development Intern, *Trip Value* 01/2025 – 03/2025
- Built responsive React components to improve booking flow and user experience.
- Enhanced page responsiveness by ~25%, making the platform faster and smoother.
- Integrated REST APIs in Node.js/Express for flights, bookings, and payments.
- Collaborated with the development team to debug, test, and optimize both frontend and backend components.

Projects

Restaurant Booking System, *https://coffee-cup-gamma.vercel.app/*
- Built a smooth table booking and event registration system with waitlisting and QR code check-ins
- Added a VR-based restaurant layout preview for immersive user experience
- Developed a secure backend for user authentication and role management
- Designed an interactive menu, chef showcase, and guest review section

Text To VR Image Converter, *https://hike-12.github.io/VR_Image/*
- Developed a web app named "Text To VR Image Converter" that let user type prompt or upload image to get a 360° VR picture
- Added in-browser VR view on mobile and desktop, so user can swipe, click, or tilt device to look around
- Built a simple UI to switch between AI image generation and manual upload modes easily

Solar System Using 3js, *https://solar-system-mu-amber.vercel.app/*
- The solar system made using 3js with realistic textures.

Skills

Languages & Web Technologies
HTML, CSS, JavaScript, SQL, Tailwind CSS, Python, C, C++, React, 3js

Database
MySQL, MongoDB, PostgreSQL

Data Analysis
Pandas, NumPy, Matplotlib

Backend
Django, Node.js, Express, Flask, FastAPI, Next.js

Tools & Platforms
Git, GitHub, Render, Vercel, Firebase

Other Skills
Problem-Solving, Debugging, Team Collaboration, Leadership
